## SKILLS

- JavaScript
- TypeScript
- React
- React Native
- Next.js
- HTML
- CSS
- Redux
- Bootstrap
- Tailwind
- Node.js
- Express
- MongoDb
- PostgreSQL

## PROFESSIONAL SUMMARY

**Experienced Front-End Developer** with a strong background in building responsive, scalable web apps using **JavaScript, TypeScript, and React**. Skilled in creating intuitive interfaces and reusable components for consistent UX. Proficient in developing and integrating **RESTful APIs** with **Node.js** and **Express**, using **MongoDB** and **PostgreSQL** for data modeling and backend integration. Working with cross-functional teams to deliver polished, production-ready products. Confident with **Git, CI/CD**, and agile workflows.

## EXPERIENCE

**Front-End Web Developer**  January 2025 - Present

BIDZ Influencer Marketplace

- Developed new features and reusable React UI components, enhancing the user interface and improving user experience across the platform.
- Optimized existing JavaScript functionality using modern techniques, resulting in a 25% improvement in application performance and responsiveness.
- Collaborated with UI/UX Designers and developers to deliver a cohesive, user-centered product with consistent design and seamless usability.
- Implemented a robust Git version control system with GitHub Actions for CI/CD, automating tests and deployments and reducing deployment time by 20%.
- Troubleshooted and resolved technical issues, ensuring application stability and reducing user-reported errors by 30% using JavaScript and React debugging tools.

**Full-Stack Developer**  November 2022 - Present

Freelance / Independent Projects

- Developed and deployed multiple Full-Stack applications, managing Front-End, Back-End development and Database
- Designed and implemented modern UI/UX, ensuring smooth and engaging user experience
- Built and optimized custom RESTful APIs and database queries to improve application performance, reliability, and ensure smooth data flow between client and server
- Implemented caching strategies (SWR, React Query, RTK Query) to improve data fetching and speed in slow network conditions
- Implemented a robust Git version control system with GitHub Actions for CI/CD, automating tests and deployments

- Stripe
- Docker
- Jest
- React testing Library
- Playwright
- WebPack
- Babel
- ESlint
- Git
