Skills

Front-End

- JavaScript
- TypeScript
- React
- Next.js
- HTML, CSS
- Redux, Redux Toolkit
- Bootstrap / Tailwind

Back-End & Database

- Node.js
- Express
- MongoDb
- Mongoose
- PostgreSQL
- Prisma
- Stripe

Additional Tools

- Docker
- i18-next
- Jest / React testing Library
- Playwright
- WebPack, Babel, ESlint
- Git, CI/CD

Languages

- English
- Hebrew
- Russian

Vlad Medvedev
Front-End Developer

Summary

Front-End Developer with 4+ years of hands-on experience in JavaScript, TypeScript, React, Next js, Redux, and Node js. Passionate about building scalable, high-performance applications with a focus on clean, maintainable code.
Developed and deployed multiple real-world projects, including dynamic web applications and API-driven platforms. Skilled in architecture design, API integration, debugging, and performance optimization. Continuously learning and improving to deliver top-quality solutions.

Experience

Freelance / Independent Projects (November 2022 - Present)

- Developed and deployed multiple Full-Stack applications, managing Front-End, Back-End development and Database.

- Designed and implemented modern UI/UX, ensuring smooth and engaging user experience.

- Built and optimized custom RESTful APIs and database queries to improve application performance, reliability, and ensure smooth data flow between client and server.

- Implemented caching strategies (SWR, React Query, RTK Query) to improve data fetching and speed in slow network conditions.

- Migrated projects to TypeScript, resolving type inconsistencies and improving development workflow.

- Set up and maintained CI/CD pipelines to automate testing, deployment, and code quality assurance, using Jest, React Testing Library, and Playwright for application stability and performance testing.

Key Projects

Foody - Full-stack food delivery application with database, integrated payment system, user registration, and authentication.

GadgetHub - Full-stack e-commerce platform with database, secure payments, user authentication, and product management.

Portfolimix - Portfolio application with elegant UI and API-driven content management

Musix - Full-stack music streaming app with a database, backend API, and interactive UI.

Chat App - Real-time chat application using WebSockets.

Education

- **Bachelor's Degree in Music**
- **Bachelor's Degree in Sound Engineering**
- **Hexlet - JavaScript & React Development Courses**

Completed 350+ tasks covering JavaScript, React, Testing, CI/CD, and full-stack development.
